Professional Summary

MERN Stack Developer with hands-on experience building scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST APIs, authentication, real-time communication with Socket.io/WebRTC, and solving 200+ DSA problems on LeetCode. Passionate about developing high-performance, user-centric applications.

Technical Skills

Programming Languages: Java (Core), JavaScript

Frontend Development: HTML5, CSS3, React.js, Bootstrap, EJS, Material UI

Backend Development: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose, MySQL

Tools & Technologies: Git, GitHub, Socket.io, WebRTC, Axios, Passport.js, Joi, Postman, Vercel, Render

Core Competencies: Data Structures & Algorithms (DSA), Object Oriented Programming (OOP), Operating System (OS), Database Management System (DBMS), Computer Networks (CN), MVC Architecture

Education

KIT'S College Of Engineering

B.E. in Computer Science (Artificial Intelligence & Machine Learning) – CGPA: 8.5 / 10.0

Kolhapur, India

Aug 2023 – Jul 2026

Shri. Sambhajiraje Secondary and Higher Secondary School

Higher Secondary School Certificate (XII) – Percentage: 70.31%

Pune, India

2023

Projects

Connectify – Real-Time Video Conferencing Platform | *React.js, Node.js, Express, MongoDB, WebRTC, Socket.io*

- Built a real-time video conferencing platform supporting multiple users with WebRTC and Socket.io, reducing communication latency and enabling seamless video, audio, and chat functionality.
- Integrated **WebRTC** and **Socket.io** to establish low-latency, live video/audio streaming alongside a synchronized real-time chat interface.
- Implemented secure user authentication and persistent meeting history management utilizing **MongoDB**.
- Deployment Link: <https://connectifyfrontend-9z9v.onrender.com/>

Wanderlust – Full-Stack Travel Listing Platform | *Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js*

- Developed a responsive, end-to-end travel marketplace application leveraging a structured **MVC (Model-View-Controller)** architecture.
- Built complete CRUD functionality for destination listings and user reviews, reinforced with **Joi** schema validation for data integrity.
- Secured the platform by implementing robust authentication, authorization, and session management via **Passport.js**.
- Deployment Link: <https://wanderlust-qc6r.onrender.com>

MarketPulse – Full-Stack Trading & Market Ecosystem | *React.js, Node.js, Express, MongoDB, Mongoose*

- Architected a scalable trading backend utilizing a decoupled MongoDB schema hierarchy to seamlessly manage holdings, order executions, and positions.
- Built a modular portfolio dashboard using reusable frontend components integrated with dynamic Chart.js data visualizations.
- Implemented an interactive buy order execution panel utilizing React context state management to track and handle user buying workflows.

Technical Achievements & Certifications

- **Algorithmic Problem Solving:** Successfully solved 200+ data structures and algorithms questions on LeetCode.
- **7th Edition HSIL Hackathon (2026):** Participated at KIIT, in collaboration with the Harvard T.H. Chan School of Public Health – Health Systems Innovation Lab.
- **Delta Course (Full Stack Web Development):** Completed comprehensive ecosystem training under Apna College [\[Verify Credential\]](#).
- **Alpha Course (DSA with Java):** Completed comprehensive algorithmic curriculum under Apna College [\[Verify Credential\]](#).
- **AI Research Foundations Course 5:** Completed foundational program via Google DeepMind, exploring advanced core concepts, research methods, and governance infrastructure.
